

How to draw a dragon

Ready to illustrate your own dragon adventures?
Follow the step-by-step guide below to get started!

Step 1

Use a pencil to draw a rough outline of the body and the head. Try to get the scale right.

Step 2

Add shape to the head and connect it to the body. Draw a line to determine the shape of the tail.

Step 3

Add in the rest of the tail and the top of the hind legs. For the far leg, start from the edge of the body.

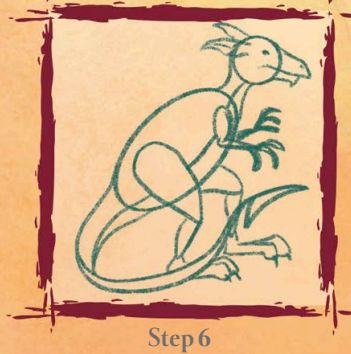

Step 4

Draw on lower legs going from the knee to the ankle, then add ears and eyes to the dragon's head.

Step 5

Add two front arms and then add the feet. Be careful not to draw over the tail when you do.

Step 6

Draw a line along the dragon's body to give it an underbelly. Make the end of the tail spiky.
