

Keep me beautiful

Keep my fronds clean so they are better able to take in light, but avoid chemical wipes as I am quite sensitive; give me a quick shower instead. And turn me frequently, so every part gets light, to encourage symmetrical growth.

I will calm and soothe

Plant me in a hanging basket or place me on a pedestal so that my fronds can trail over the sides and cascade down. This will give a beautiful weeping-willow effect, providing a gentle, soothing presence in the room.

Help me feel at home

I like warmth and humidity, and happily grow in a bathroom or kitchen. In other rooms, you can mist me regularly or place me near a humidifier.
