

I can cope with neglect

I am extremely low-maintenance and will tolerate a bit of neglect. In fact, the only thing I don't like is being overwatered, so always let my soil dry out before watering me again. You may be able to spot if I've been overwatered since my leaves will start to go soggy or mushy.

I'll protect you

In feng shui, I am believed to have a strong protective energy. The spiky nature of my leaves is said to shield you from negative *chi*, although this is sometimes interpreted as an aggressive energy, with some people suggesting I shouldn't be placed in busy social areas.

BE AWARE: I can cause nausea and vomiting if eaten, so keep me away from children and pets.
