

PLANTS TO SPARK CREATIVITY

Some of our greatest inspirations come from nature, most of them from the awe of its beauty and intricacy. The individuality, complexity, form, and color of plants open the mind to the wonders of creativity and the infinite possibilities of our imagination.

◀ Velvet plant *Gynura aurantiaca*

With the ultraviolet purple hairs on its leaves, the gothic, almost supernatural look of the velvet plant will inspire you to think outside the box and not follow the norm—just like this unique plant. It will electrify your mind, spark your creativity, and pique your curiosity. *See pp.90–91*

◀ King begonias *Begonia rex* cultivars

The intricately patterned leaves of these begonias look almost hand painted, with the fusion of colors resembling our thought patterns as they lead to unexpected places and inspire new visions. The bold shapes of this plant will inspire bold ideas. *See pp.46–47.*
