

I will keep you calm

You humans can see more green shades than most other colors, and green is a good color to calm and soothe the brain. I have it in spades, so let me relax you with my refreshing shades.

Love my leaves

The ribbons of dark green, light green, and cream on my paddle-shaped leaves make me a handsome foliage houseplant. Turn me frequently so all of my leaves get access to bright, indirect light, and avoid direct light, as this will burn them. This is why I will thrive better than most in an office with limited natural light.

BE AWARE: My sap is harmful if eaten, so keep me away from children and pets.
