

I'll remove toxins

I can help you maintain a healthy immune system by filtering benzene from the air. This hydrocarbon comes from the emissions of gas-fueled cars and cigarette smoke and is associated with various adverse health effects.

Love my leaves

You can also find me in other color variegations, including tri-color specimens, which have pink, green, and yellow leaves. My old leaves can be removed from the base of the trunk and you can cut back my stems to keep me at the size you like.

Be mindful of me

I am an easy plant to keep and have the ability to be drought tolerant if you forget to water me. Please look after my leaves by cleaning the dust off them with a wet cloth so I can breathe more easily.

BE AWARE: I am harmful to pets if eaten, so keep me away from cats and dogs.
