

I'm a showstopper

My name amaryllis comes from the Greek, meaning "sparkling," for my breathtaking multiheaded blooms, which can be found in red, orange, and pink. You'll be amazed that a bulb can produce such beauty.

Let's be strong together

I am commonly thought to signify determination and strength, making my flower the perfect symbol for the Huntington's disease community across the world. I represent hope and help to raise awareness of advancing research on the condition.

BE AWARE: My bulb is harmful if eaten, so keep me away from children and pets.
