

HOW TO MAKE SENSATIONAL SPEAKERS

It's really easy to make these impressive speakers. Just find a cardboard tube and some paper cups, and you're almost there. You will also need scissors to cut some materials, so ask an adult if you need a hand with this part. When you're done, your new speakers will make your music louder and clearer—and, best of all, they won't cost you any of your allowance!

WHAT YOU NEED

Two paper cups

Mobile phone

Paint

Cardboard tube

Paper towels

Felt-tipped pen

Scissors

Paintbrush

1 With the felt-tipped pen, trace around the end of your phone, halfway along the cardboard tube. Cut along one long side and the two short sides of the rectangle to make a flap. Open up the flap to make a slot.

2 Place the end of the tube against the side of one of the paper cups, close to the lip. Hold the tube steady and draw around it with your pen. Cut out the circle you have drawn. Repeat with the other cup.
