

DAZZLING KALEIDOSCOPE

Enjoy a never-ending, dizzying display of colors, shapes, and patterns—no batteries needed! This can be done with a kaleidoscope, a tube that you look down, rather like peering through a telescope. It has mirrors inside and some colorful objects at one end. You can make a kaleidoscope from a cardboard tube, a plastic folder, and a handful of sparkly beads.

Turn the kaleidoscope to see the pattern change—it's never the same twice!
