

HOW TO MAKE A DAZZLING KALEIDOSCOPE

A cardboard tube from a roll of paper towels is the perfect size for your kaleidoscope. Inside the tube, you need three reflective surfaces—this can be made from a plastic document folder. However, if you can find it, mirrored paper also works well. When your kaleidoscope is finished, look through it and point it toward a lamp or out of the window. But remember to never point the tube directly at the sun, because you could damage your eyes.

WHAT YOU NEED

Time
30 minutes

Difficulty
Hard

1 Stand the cardboard tube upright on one of the pieces of colored paper, and draw around the end of the tube. Put the tube to one side, and draw six tabs around the outside edge of the drawn circle. Cut out the circle with the tabs.

2 Place the circle over one end of the tube. Stick down the tabs with tape. Make a hole in the center of the circle with the pencil point. Measure the tube's length and the diameter (width) of the circle.
