

Comb pottery

In Russia, people decorated their pots by dragging combs across them.

Amber sculpture of a horse

This horse was carved from amber, which is fossilized tree resin. Amber from the coast of the Baltic Sea was traded across Europe.

Corded-ware pot from northern Germany

When farming people entered Europe from Asia around **6000 BCE**, they brought herds of cattle with them.

Bull

The first farmers in Europe lived in small villages, which would usually have five to eight wooden longhouses.

Wooden longhouse

At Göbekli Tepe, people built a stone circle for ceremonies around **9000 BCE**. They used massive carved stones.

World's first town

Çatalhöyük

World's oldest temple

Women harvesting wheat

Jericho

Çatalhöyük, founded around **7500 BCE**, is the world's oldest large town. It was five-times bigger than Jericho.

Farmers harvested wheat with curved tools called sickles, which had blades made of stone.

Decorated objects

Stone Age people invented pots to cook and store food. In different parts of Europe, people decorated pots in different ways, making patterns with cords (strings), shells, or combs. They also made art out of materials such as amber.

KEY

Fertile Crescent

An area with rich soil for growing plants.

Monoliths

Stone structures called monoliths were built across Europe.

Jericho

Farming allowed people to settle down in villages, which later grew into towns. One of the oldest is Jericho, which dates from **9600 BCE**. It was defended by a high stone wall.
