

Quick quiz

Why do wasps have stripes?

What is a wasp's antennae used for?

How many lenses are in a wasp's eye?

A wasp can sting many times, but a bee can sting only once.

Scent detector

The stalks on a wasp's head are called antennae. It uses them to detect scents and tastes.

Super eyesight

A wasp's eyes are made up of thousands of tiny lenses. They make the wasp very good at spotting moving objects.

Pinching jaws

The wasp's jaws have hard, sharp edges. They work like scissors, pinching together to cut into and mash up prey.
