

Did dinosaurs eat people?

Dinosaurs ate plants or other animals or dinosaurs, but not people! Massive meat-eating dinosaurs died out millions of years before humans appeared on the Earth. The idea of a *Tyrannosaurus rex* (T. rex) snacking on humans is an invention of films.

Scary smiles

A T. rex had 60 teeth that were as long and sharp as knives. This helped the meat-eating dinosaur cut through the flesh of its prey.

How many teeth did a T. rex have?

What did it use its tail for?

What were pterodactyls?

Open wide

Meat-eating dinosaurs had massive jaws that opened extra wide.
