

INDEX

Page numbers in **bold** refer to main entries.

A

absolute zero 82, 94
alpha decay 70, 113
alpha particles 113
amplitude
 wave function 36–37, 40
 waves 14, 17
antimatter **128–29**
antiparticles 128, 132
atomic clocks **88–89**
atomic energy states **30**, 40
atomic force microscopy
 (AFM) 102–103
atoms
 cold atom physics **82**
 quantum model 11
 Rydberg **83**
 solid-state physics **76–77**
 splitting **114–15**
 stimulated emission 86
 structure of **10–11**, 25, 30,
 31, 65
 see *also* nuclei, atomic

B

band theory of solids **90**, 92
baryons 12, 135
Bell, John Stewart 47, 57
Bell-state analyzer 74
Bell's theorem 57
beta decay 21, 113
beta particles 21
Big Bang 55, 121, 138, 140
biochemistry 147
birds, migrations **152–53**
bits 106, 107
black-body radiation 26, 27,
 28

Bloch spheres 106
Bohr, Niels 10, 30, 147
Bohr model 10, 30, 31
Born, Max 40
Born rule **40**, 53
Bose-Einstein condensates
 78–79, 82
Bose-Einstein statistics 68,
 80
bosons 13, 21, **68**, 79, 81,
 119, 130, 134
 Bose-Einstein condensates
 78–79
brain function **155**
branes 142, 143
bubble chambers **120**

C

Calabi-Yau manifold 143
capacitors 93
cell mutation **150**
chain reactions 114–15
change, predicting 44–45
charge-coupled devices
 (CCDs) **93**
classical physics 28, 38, 51,
 53
closed vibrating strings 142
cloud chambers 120
coherence 75
cold atom physics **82**
color charge 122, 135
composite particles 119, 122
computer chips 91
computers, classical 107
conduction 76, 81
conjugate variables 43
consciousness **155**
consistent histories **62**

constructive waves 17
Cooper pairs 81, 94, 95
Copenhagen interpretation
 52–53, 56, 59
cosmological interpretation
 55
coulomb forces 71, 117
cryptochromes 152, 153
cryptography **108**
crystalline structure 76–77

D

dark energy 131
dark matter 130
data storage, solid state 90
de Broglie, Louis Victor 7, 56
decoherence **75**
degrees of belief 61
destructive waves 17
diffraction 16, 18
digestion 151
digital imaging 93
dimensions, hidden 143
diodes, light-emitting 90, 92
DNA **150**
doping 91
double slit experiment 18–19

E

Einstein, Albert 23, 32, 52,
 63, 115
electric charge
 atoms 10–11
 particles 67
electrical current 81
electromagnetic attraction
 11, 22
electromagnetic energy 97
