

PURPLE

***Billardiera longiflora***

Evergreen, woody-stemmed, twining climber with narrow leaves. Small, bell-shaped, sometimes purple-tinged, green-yellow flowers are produced singly in leaf axils in summer, followed by purple-blue fruits in fall.

H to 6ft (2m).

☀️ ♂ Z8-9

***Ampelopsis megalophylla***

Vigorous, deciduous climber with glaucous shoots and large, pinnate to 2-pinnate, dark green leaves, glaucous beneath. Axillary clusters of small, green flowers, in summer, are followed by small, top-shaped, purple fruits that later turn black. H 30ft (10m).

☀️ ♂ Z5-8

***Ampelopsis brevipedunculata* var. *maximowiczii***

Vigorous, deciduous, woody-stemmed twining, tendrill climber with dark green leaves that vary in size and shape. Bears inconspicuous, greenish flowers in summer, followed by pinkish-purple, later bright blue berries. H to 15ft (5m).

☀️ ♂ Z5-8

***Vitis vinifera* 'Purpurea'**

Deciduous, woody-stemmed, tendrill climber with toothed, 3- or 5-lobed, purplish leaves, white-haired when young. Has tiny, pale green flowers in summer and tiny, green or purple berries. H to 23ft (7m).

☀️ ♂ Z6-9

***Parthenocissus tricuspidata* 'Veitchii'**

Vigorous, deciduous, woody-stemmed, tendrill climber. Has spectacular, red-purple, fall leaf color and dull blue berries. Greenish flowers are insignificant. H to 70ft (20m).

☀️ ♂ Z4-8 ⚠️
