

Plants for neutral to acidic soil

Some plants, notably camellias, rhododendrons, and most heathers, grow naturally in regions such as open woodlands, hillsides or moorlands where the soil is neutral to acidic, and are intolerant of alkaline soils such as limestone or chalk. They are often termed “lime-haters” or “acid-lovers.” Before planting, work in some acidic potting mix or humus. After planting, keep woody plants well mulched. In drier regions, check water needs regularly.

TREES

Acer davidii, p.78
Acer griseum, p.78
Acer grosseri, p.78
Acer palmatum and cvs, pp.78, 89, 90, 123, 138, 156
Acer pensylvanicum ‘Erythrocladum’, p.78
Arbutus menziesii
Arbutus unedo, p.93
Embothrium coccineum, p.86
Eucryphia (most), pp.85, 129
Magnolia doltsopa, p.71
Nyssa sinensis, p.77
Nyssa sylvatica, p.66
Oxydendrum arboreum, p.76
Pinus densiflora
Pterostyrax hispida, p.73
Stewartia pseudocamellia, p.78
Stewartia sinensis
Styrax japonicus, p.72

Conifers

Abies spp. and cvs, pp.95, 96, 98, 100, 104, 105
Picea spp. and cvs, pp.98, 99, 100, 101, 103, 105
Pinus densiflora
Pinus pumila
Pinus strobus, p.96
Pseudolarix amabilis, p.102
Pseudotsuga menziesii var. *glauca*, p.96
Sciadopitys verticillata, p.101
Tsuga heterophylla

SHRUBS

Acer palmatum ‘Shindeshojo’, p.123
Amelanchier lamarckii, p.110
Andromeda polifolia ‘Compacta’, p.333
Arctostaphylos (some), pp.144, 147
 CAMELLIAS, pp.120–121
Chamaedaphne calyculata
Enkianthus spp., pp.111, 120, 123
Euonymus fortunei ‘Emerald Gaiety’
Fatsia japonica
Fothergilla gardenii
Fothergilla major, p.117
Gaultheria spp., pp.145, 154, 163, 164
 HEATHERS, p.166, most
Kalmia spp., pp.136, 156
Leptospermum scoparium ‘Red Damask’, p.123
Leucothoe fontanesiana and cvs, p.167
Lyonia ligustrina
Myrica gale, p.162
Philesia magellanica
Pieris spp. and cvs, pp.110, 120, 137
Rhododendron groenlandicum, p.145
Rhododendron multiflorum var. *purpureum*, p.125
 RHODODENDRONS, pp.124–125, most
Styrax officinalis, p.112
Telopea speciosissima, p.137
Vaccinium (most), pp.150, 163, 165, 351
 WITCH HAZELS, p.118
Zenobia pulverulenta, p.130

CLIMBERS AND WALL SHRUBS

Asteranthera ovata
Berberidopsis corallina, p.202
Crinodendron hookerianum, p.202
Desfontainia spinosa, p.203
Mitraria coccinea, p.193

PERENNIALS

Dianella tasmanica, p.239
Ourisia coccinea, p.269
Smilacina racemosa, p.223
Tolmiea menziesii
Trillium spp., pp.255, 260, 350
Uvularia grandiflora, p.262

Grasses and Bamboos

Deschampsia cespitosa ‘Gold Tau’, p.289
Molinia caerulea subsp. *arundinacea* ‘Transparent’, p.286
Molinia caerulea subsp. *caerulea* ‘Variegata’

Ferns

Adiantum spp., pp.291, 292
Blechnum spp., pp.290, 292
Cryptogramma crispa, p.293

ANNUALS AND BIENNIALS

Calibrachoa cvs, pp.300, 306

ROCK PLANTS

Arctostaphylos uva-ursi spp. and cvs, pp.375, 376
Cassiope spp., pp.332, 349
Cornus canadensis, p.360
Corydalis cashmeriana
Cyananthus spp., pp.359, 369
Epigaea gaultherioides, p.351
Galax urceolata, p.336
Gaultheria spp., pp.346, 373
Gentiana sino-ornata, p.370
Linnaea borealis, p.363
Lithodora diffusa ‘Heavenly Blue’, p.343
Mitchella repens

Ourisia spp., pp.360, 362
Phlox adsurgens
Phlox stolonifera
Phylodoce spp., pp.333, 334
Shortia spp., pp.349, 352

BULBS, CORMS, AND TUBERS

Lilium speciosum var. *rubrum*
Lilium superbum, p.390

WATER AND BOG PLANTS

Sarracenia flava, p.445

TENDER AND EXOTIC PLANTS

Shrubs
Boronia megastigma, p.456
Epacris impressa, p.455
Gardenia jasminoides
Pimelea ferruginea, p.454
Protea spp., p.454

Climbers

Agapetes spp., p.461
Allamanda cathartica ‘Hendersonii’, p.464

Perennials

Aspidistra spp.
Calanthe striata, p.275
Caulokaempferia petelotii
Centropogon cordifolius
Cypripedium reginae, p.466
Drosera spp., p.473
Nepenthes x hookeriana, p.473
Peliosanthes arisanensis, p.472

BELOW A carpet of heather

Heathers (*Erica*) create dramatic sweeps of winter color in this heather garden. The majority of heathers thrive in well-drained, acidic soil in full sun.

Gaultheria mucronata ‘Wintertime’

Fothergilla major
