

BLUE

***Ipheion uniflorum* 'Froyle Mill'**

Spring-flowering bulb with narrow, semierect, basal, pale green leaves that smell of onions if crushed. Each leafless stem bears a star-shaped, violet-blue flower, 1¼–1½in (3–4cm) across. **H** 4–6in (10–15cm), **S** 2–3in (5–8cm).

☀️ ♂ Z5–9

Romulea bulbocodium

Spring-flowering corm with long, semierect, threadlike leaves in a basal tuft. Slender flower stems each bear 1–6 upward-facing flowers, usually pale lilac-purple with yellow or white centers. **H** 2–4in (5–10cm), **S** 1–2in (2.5–5cm).

☀️ ♂ Z5–9

Moraea sisyrinchium

Spring-flowering corm with 1 or 2 semierect, narrow, basal leaves. Wiry stems each bear a succession of lavender- to violet-blue flowers, 1¼–1½in (3–4cm) across, with white or orange patches on the 3 larger petals. **H** 4–8in (10–20cm), **S** 3–4in (8–10cm).

☀️ ♂ Z9–10

Bellevia hyacinthoides

Spring-flowering bulb with prostrate, narrow leaves in a basal cluster. Bears a dense spike of up to 20 bell-shaped, pale lavender-blue, almost white flowers with darker, central veins. **H** 2–6in (5–15cm), **S** 2in (5cm).

☀️ ♂ Z7–9

Scilla x allenii

Early spring-flowering bulb producing 2 narrow, semierect, basal, dark green leaves and a loose spike of flattish, star-shaped, deep blue flowers, ½–¾in (1–2cm) across. **H** 4–6in (10–15cm), **S** 1–2in (2.5–5cm).

☀️ ♂ Z3–9

***Muscari comosum* 'Plumosum'**
(Feather grape hyacinth)

Spring-flowering bulb with up to 5 strap-shaped, semierect, basal, gray-green leaves. Sterile flowers are replaced by a fluffy mass of purple threads. **H** to 10in (25cm), **S** 4–5in (10–12cm).

☀️ ♂ Z4–8

Scilla forbesii

Early spring-flowering bulb with 2 semierect, narrow, basal leaves. Bears a spike of 5–10 outward-facing, rich blue-lilac flowers with white eyes. **H** 4–10in (10–25cm), **S** 1–2in (2.5–5cm).

☀️ ♂ Z3–9

***Anemone blanda* 'Atrocaerulea'**

Knobby tuber with semierect, dark green leaves that have 3 deeply toothed lobes. In early spring, stems bear an upright, flattish, bright blue flower, 1½–2in (4–5cm) across, with 9–14 narrow petals. **H** 2–4in (5–10cm), **S** 4–6in (10–15cm).

☀️ ♂ Z4–8 ⚠️

Brimeura amethystina

Late spring-flowering bulb with very narrow, semierect, basal leaves. Each leafless stem bears a spike of up to 15 pendent, tubular, blue flowers. **H** 4–10in (10–25cm), **S** 1–2in (2.5–5cm).

☀️ ♂ Z5–9
