

ALOES

Aloes are abundant in Mediterranean and African gardens. There is a huge range of species and hybrids, providing a kaleidoscope of growth forms, flowers, and leaf variegation. Unlike agaves, aloes do not die after flowering, but gradually produce a trunk, becoming shrubs or small trees. Aloes typically produce their leaves singly, and the center of the rosette is usually hollow, reminiscent of a bromeliad. A few species, such as *A. aristata* are frost hardy, and can be grown in rock gardens or at the base of a south-facing wall.

Pachycereus schottii

Columnar, perennial cactus, branching with age. Olive- to dark green stem, covered with small, white spines, bears 4-15 ribs. Funnel-shaped, pink flowers are produced at night in summer. **H** 22ft (7m), **S** 6ft (2m). Min. 50°F (10°C).

☀️ ⚡️ Z10-11

Epithelantha micromeris

Slow-growing, spherical, perennial cactus with a green stem completely obscured by close-set areoles bearing tiny, white spines. Bears funnel-shaped, pale pinkish-red flowers, 1/4in (0.5cm) across, on a woolly crown in summer. **H** and **S** 1 1/2in (4cm). Min. 50°F (10°C).

☀️ ⚡️ Z10-11

Rhipsalis floccosa* var. *tucumanensis

Pendent, perennial cactus with cylindrical, green stems, to 1/2in (1cm) across, branching less than many other *Rhipsalis* species. Bears abundant very pale pink flowers in early summer, then pinkish-white fruits. **H** 3ft (1m), **S** 20in (50cm). Min. 50°F (10°C).

☀️ ⚡️ Z10-11

Duvalia corderoyi

Clump-forming, perennial succulent. Has a prostrate, leafless stem with 6 often purple, indistinct ribs. Bears star-shaped, dull green flowers, 1/2in (1cm) across and covered in purple hairs, in summer-fall. **H** 2in (5cm), **S** 2ft (60cm). Min. 50°F (10°C).

☀️ ⚡️ Z10-11

Oreocereus celsianus
(Old man of the Andes)

Slow-growing, perennial cactus. Has heavy and wispy spines. Mature plants bear solitary, pale purplish-pink flowers in summer. **H** 3ft (1m), **S** 1ft (30cm). Min. 41°F (5°C).

☀️ ⚡️ Z9-11

Euphorbia obesa (Living baseball)

Spherical, perennial succulent. Spineless, dark green stem, often checkered light green, has 8 low ribs. Crown bears rounded heads of cupped, yellow flowers in summer. **H** 5in (12cm), **S** 6in (15cm). Min. 50°F (10°C).
