

to fall, deep red flowers, 5–6in (12–15cm) across, with contrasting yellow anthers, are produced in abundance. Z5–9

C. ‘Rosy O’Grady’ (Atragene Group; illus. p.200). Early small-flowered clematis (group 1). H 10–13ft (3–4m), 5 3ft (1m). Open, bell-shaped, deep pink to mauve-pink flowers, 2½–5in (6–12cm) across, with creamy-white staminodes, are produced from late spring to early summer and again in fall. Z5–9

C. ‘Rouge Cardinal’. Early large-flowered clematis (group 3). H 6–10ft (2–3m), 5 3ft (1m). In summer, bears single, velvety, crimson flowers, 3–4in (8–10cm) across, with red anthers. Z5–9

C. ROYAL VELVET (‘Evifour’). Early large-flowered clematis (group 2). H 6–8ft (2–2.5m), 5 3ft (1m). In early and mid-summer, bears single flowers, 4–6in (10–15cm) across, with bluish, rich velvet-purple petals, with darker central bands, and red anthers. Z5–9

C. ‘Silver Moon’ (illus. p.200). Early large-flowered clematis (group 2). H to 13ft (4m), 5 3ft (1m). Produces single, silvery-mauve flowers from late spring to early fall. Z5–9

C. ‘Souvenir du Capitaine Thuilleaux’. Compact, early large-flowered clematis (group 2). H 8ft (2.5m), 5 3ft (1m). In early summer, bears single flowers, 3–4in (8–10cm) across, with red anthers and deep pink-striped, cream-pink petals. Ideal for a container or patio garden. Z5–9

C. ‘Star of India’. Vigorous, late large-flowered clematis (group 3). H 10ft (3m), 5 3ft (1m). Bears a profusion of single, deep purple-blue flowers, 3–4in (8–10cm) across, with light brown anthers, in mid-summer; petals have a deep carmine-red stripe. Z5–9

C. SUGAR CANDY (‘Evione’). Vigorous, early large-flowered clematis (group 2). H 10ft (3m), 5 3ft (1m). Bears an abundance of pinkish-mauve to light purple flowers, 4–6in (10–18cm) across, with darker, central bars on the sepals and yellow anthers. Z5–9

C. ‘Sunrise’ (illus. p.199). Vigorous Montana clematis (group 1). H and S 25–30ft (8–10m). Leaves are reddish-purple when young. Slightly scented, semidouble or double, deep pink, single flowers are borne in spring. Z5–9

C. tangutica. Vigorous, late-flowering clematis (group 3). H 15–20ft (5–6m), 5 6–10ft (2–3m). Has lantern-shaped, single, yellow flowers, 1½in (4cm) long, throughout summer and early fall; these are followed by fluffy, silvery seed heads. Z5–9

C. THE COUNTESS OF WESSEX (‘Evipo073’) (illus. p.198). Early large-flowered clematis (group 2). H 3–5ft (1–1.5m), 5 3ft (1m). From early to midsummer, and again from late summer to early fall, bears flattish, frilled, white to pale pink flowers, 5½–7in (14–17cm) across, flushed pink-purple at the base of each central bar, with deep red anthers. Z5–9

C. ‘The President’. Early large-flowered clematis (group 2). H 6–10ft (2–3m), 5 3ft (1m). In early summer, bears a profusion of single, rich purple flowers, silver beneath, 4in (10cm) across, with red anthers. Z5–9

C. ‘Tie Dye’. Late large-flowered clematis (group 3). H 10–13ft (3–4m), 5 5ft (1.5m). In summer, bears single, violet-purple to

violet-blue flowers, 4–6in (10–15cm) across, marbled with white throughout, but especially along each central bar. A sport from C. ‘Jackmanii’. Z5–9

C. tubulosa, syn. *C. heracleifolia* var. *dauidiana*. Herbaceous clematis (group 3). H 3ft (1m), 5 2½ft (75cm). In summer, thick stems bear axillary clusters of scented, tubular, single, pale blue flowers, ¾–1¼in (2–3cm) long, with reflexed petal tips. Z5–9.

‘Wyevale’ has strongly scented, dark blue flowers.

C. urophylla ‘Winter Beauty’, syn. *C. clarkiana* of gardens, *C. ‘Winter Beauty’*. Early small-flowered, evergreen clematis (group 1). H 10–15ft (3–5m), 5 5ft (1.5m). Has ternate, glossy, dark green leaves with elliptic leaflets. In midwinter, produces single, softly hairy, cream to white flowers, 1½in (4cm) across, opening tulip-shaped but maturing to open bell-shaped with spayed tips. Z8–11

C. VESUVIUS. See C. GALORE (‘Evipo032’).

C. VICTOR HUGO (‘Evipo007’). Vigorous, scandent, non-clinging, late large-flowered clematis (group 3). H 8–10ft (2.5–3m), 5 3ft (1m). Produces an abundance of red-violet flowers, 3in (8cm) across, with dark, violet-tipped stamens, from early summer until fall. Z5–9

C. VIENNETA (‘Evipo006’) illus. p.199. Vigorous, late medium-flowered clematis (group 3). H 6–10ft (2–3m), 5 3ft (1m). Between early summer and fall, bears unusual, passion-flowerlike, rounded blooms with 6 creamy-white, regularly placed sepals, surrounding a ring of purple, modified stamens and a dark center. In fall, the outer sepals develop a greenish hue. Z7–9

C. ‘Ville de Lyon’. Late large-flowered clematis (group 3). H 6–10ft (2–3m), 5 3ft (1m). In midsummer, bears single, bright carmine-red flowers, 3–4in (8–10cm) across, with darker petal edges and yellow anthers. Lower foliage tends to become scorched by late summer. Z5–9

C. VINO (‘Poulvo’) (illus. p.200). Vigorous, early large-flowered clematis (group 2). H 10ft (3m), 5 3ft (1m). Produces numerous, deep petunia-red flowers, 4–7in (10–18cm) across, with contrasting, white to cream filaments and yellow anthers, in late spring and again in late summer and early fall. Z5–9

C. viticella. Late-flowering clematis (group 3). H 6–10ft (2–3m), 5 3ft (1m). Bears nodding, open bell-shaped, single, purple-mauve flowers, 1½in (3.5cm) long, in summer. Z5–9. **‘Abundance’** see C. ‘Abundance’. **‘Étoile Violette’** see C. ‘Etoile Violette’. **‘Madame Julia Correvon’** see C. ‘Madame Julia Correvon’. **‘Purpurea Plena Elegans’** see C. ‘Purpurea Plena Elegans’.

C. ‘Vyvyan Pennell’. Early large-flowered clematis (group 2). H 6–10ft (2–3m), 5 3ft (1m). Bears double, lilac flowers, 4–5in (10–12cm) across, with a central, lavender-blue rosette of petals and golden-yellow anthers, in early summer, then single, blue-mauve flowers. Z5–9

C. ‘W.E. Gladstone’. Vigorous, early large-flowered clematis (group 2). H 10–12ft (3–4m), 5 3ft (1m). Produces single, lavender flowers, 6in (15cm) across, with red anthers, in summer. Z5–9

C. ‘Westerplatte’ (illus. p.200). Early large-flowered clematis (group 2). H 8ft

(2.5m), 5 3ft (1m). From late spring to early summer and again from late summer to early fall, produces single, dark velvet-red flowers, with white filaments and deep red anthers. Z5–9

C. ‘White Columbine’ (Atragene Group; illus. p.198). Early small-flowered clematis (group 1). H and S 6–10ft (2–3m). In spring, purple-tinted buds open to bell-shaped, nodding, single, creamy-white flowers, maturing to pure white, with petallike, greenish-white staminodes. Z5–9

C. ‘William Kennett’. Early large-flowered clematis (group 2). H 6–10ft (2–3m), 5 3ft (1m). In summer, produces a profusion of single flowers, 4–5in (10–12cm) across, with red anthers and tough, lavender-blue petals, each bearing a central, darker stripe that fades as the flower matures. Z5–9

C. ‘Winter Beauty’. See *C. urophylla* ‘Winter Beauty’.

C. WISLEY (‘Evipo001’). Strong-growing, late large-flowered clematis (group 3). H 8–10ft (2.5–3m), 5 3ft (1m). From midsummer to early fall, produces numerous, slightly nodding, violet-blue, yellow-anthered flowers, 4–5in (10–12cm) across. Z5–9

C. ‘Zohapbi’. See C. HAPPY BIRTHDAY (‘Zohapbi’).

C. ‘Zoprika’. See C. PRINCESS KATE (‘Zoprika’).

CLEOME

Spider flower

CLEOMACEAE

Genus of annuals and a few evergreen shrubs, grown for their unusual, spidery flowers. Grow in sun and in fertile, well-drained soil. Remove dead flowers. Propagate by seed sown outdoors in late spring. Aphids may be a problem.

C. hassleriana, syn. *C. spinosa* of gardens. Fast-growing, bushy annual. H to 4ft (1.2m), 5 1½ft (45cm). Has hairy, spiny stems and mid-green leaves divided into lance-shaped leaflets. Large, rounded heads of narrow-petaled, pink-flushed, white flowers, with long, protruding stamens, are produced in summer. Z10–11. (min. 39°F/4°C). **‘Colour Fountain’** illus. p.304. **‘Helen Campbell’**, H to 6ft (1.8m), 5 2ft (60cm), has fragrant, pure white flowers. **‘Rose Queen’** bears rose-pink flowers. **‘Violet Queen’** produces light purple flowers.

C. spinosa of gardens. See *C. hassleriana*

CLERETUM

SYN. DOROTHEANTHUS

AIZOACEAE

Genus of succulent annuals, suitable for hot, dry sites such as rock gardens, screes and gaps in paving. Needs sun and grows well in poor, very well-drained soil. Deadhead to prolong flowering. Propagate by seed sown under glass in early spring, or outdoors in midspring. Protect from slugs and snails.

C. bellidiforme, syn. *Dorotheanus bellidiformis*, *Mesembryanthemum criniflorum* (Ice-plant, Livingstone daisy). Low-growing, carpeting annual. H 4–6in (10–15cm), 5 12in (30cm). Has cylindrical, to spoon-shaped, fleshy, light green leaves.

CLEYERA

Daisylike flowers in white, crimson, rose-red, orange-gold or buff yellow, some zoned in a contrasting color, are freely borne in summer. Z9–11. **‘Magic Carpet’** has flowers in bright shades of pink, purple, cream, orange or white.

CLERODENDRUM

LAMIACEAE/VERBENACEAE

Genus of evergreen or deciduous trees, shrubs and climbers, grown for their showy flowers. Needs humus-rich, well-drained soil and full sun, with partial shade in summer. Water freely in growing season, less at other times. Stems require support. Thin out crowded growth in spring. Propagate by seed in spring, by softwood cuttings in late spring or by semiripe cuttings in summer. Whitefly, red spider mite and mealy bug may be a problem.

C. bungei illus. p.141.

C. thomsoniae illus. p.460.

C. trichotomum (illus. p.142). Deciduous, upright, bushy-headed, tree-like shrub. H and S 15–20ft (5–6m). Clusters of deep pink and greenish-white buds open to fragrant, white flowers above large leaves from late summer to midfall, followed by decorative, blue berries. Z7–9. **var. fargesii** has bronze young leaves, and flowers with green sepals. **var. fargesii ‘Carnival’** has variegated leaves that are bluish-green and gray with wide, irregular, creamy yellow margins in spring, which turn paler as the leaves mature; protect in winter until well established.

CLETHRA

CLETHRACEAE

Genus of deciduous or evergreen shrubs and trees, grown for their fragrant, white flowers. Needs semishade and moist, peaty, acidic soil. Propagate by softwood cuttings in summer or by seed in fall.

C. alnifolia (Sweet pepper-bush). Deciduous, bushy shrub. H and S 8ft (2.5m). Has , toothed, mid-green leaves and, in late summer and early fall, slender spires of small, bell-shaped flowers. Z3–9.

‘Hummingbird’, H 1.3ft (1m), is low-growing and rhizomatous with shiny, dark green leaves that turn yellow in fall. Terminal and axillary racemes, to 6in (15cm) long, of scented, white flowers are borne in midsummer. **‘Ruby Spice’** has deep pink flowers and shiny, dark green leaves.

C. barbinervis illus. p.129.

C. delavayi illus. p.113.

CLEYERA

PENTAPHYLACACEAE

Genus of evergreen and deciduous shrubs and trees, grown for their foliage and flowers. Needs a sheltered position in sun or semishade and moist, acidic soil. Propagate by semiripe cuttings in summer.

C. fortunei ‘Variegata’. See *C. japonica* ‘Fortunei’.

C. japonica. Evergreen, bushy shrub. H and S 10ft (3m). Small, fragrant, bowl-shaped, creamy-white flowers are borne in summer amid narrowly oblong to oblong,
