

***Sassafra albidum***

Deciduous, upright, later spreading tree. Aromatic, glossy, dark green leaves vary from ovate to deeply lobed and turn yellow or red in fall. Has insignificant, yellowish-green flowers in spring.

pH Z4-8

***Quercus castaneifolia***
(Chestnut-leaf oak)

Deciduous, spreading tree with sweet-chestnut-like, sharply toothed leaves, glossy, dark green above, gray beneath. Produces ovoid acorns, in long-scaled cups, in fall.

Z7-9

***Fagus sylvatica*** (Common beech)

Deciduous, spreading tree with ovate, wavy-edged leaves. These are pale green when young, mid- to dark green when mature, and turn rich yellow and orange-brown in fall, when nuts are produced.

Z4-7

***Quercus frainetto*** (Hungarian oak)

Fast-growing, deciduous, spreading tree with a large, domed head and handsome, large, deeply lobed, dark green leaves.

Z5-8

***Fagus sylvatica* var. *heterophylla***
'Aspleniifolia' (Fernleaf beech)

Fast-growing, deciduous, spreading tree. Has narrow, deeply cut, deep green leaves, which give a soft, feathery outline to the tree. In fall, leaves turn golden-brown and persist well into winter.

Z4-7

***Tilia tomentosa*** **'Petiolaris'** (Weeping silver linden)

Deciduous, spreading tree with pendent branches. Pointed, heart-shaped leaves, dark green above, silver beneath, shimmer in the breeze. Has fragrant, creamy-yellow flowers in late summer.

Z5-9

***Zelkova carpinifolia*** (Caucasian elm)

Deciduous tree with a short, sturdy trunk from which many upright branches arise to make an ovate, dense crown. Produces ovate, sharply toothed, dark green leaves, turning orange-brown in fall.

Z5-9

***Nothofagus alpina***

(Rauli, southern beech)

Fast-growing, deciduous, conical tree. Leaves, with many impressed veins, are dark green, turning orange and red in fall.

Z8-9
