

BLUE

Cedrus atlantica* f. *glauca
(Blue Atlas cedar)

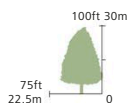

Conical conifer with silvery-blue foliage that is very bright, especially in spring. Erect, cylindrical cones are produced in fall. Is widely planted as a specimen tree.

☀️💧 Z6-7

***Abies concolor* 'Argentea'**
Conical conifer with silvery foliage that contrasts well with dark gray bark. Oblong to ovoid, pale blue or green cones are 3-5in (8-12cm) long.

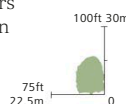

☀️💧 Z3-7

Cupressus cashmeriana
(Kashmir cypress)

Handsome, broadly conical conifer, spreading with age, with aromatic foliage borne in pendent, flat, glaucous blue sprays. Bears small, globose, dark brown mature cones.

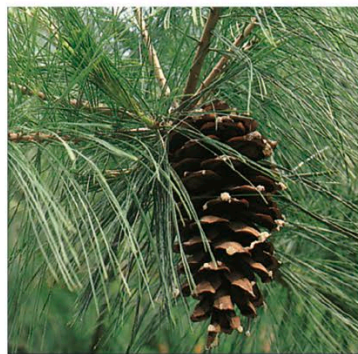

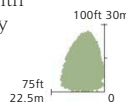

☀️💧 Z6-9

Pinus ayacahuite
(Mexican white pine)

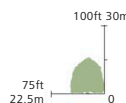

Spreading conifer with weeping leaves made up of lax, blue-green needles, to 6in (16cm) long, in bundles of 5. Pendent cones are often covered with sticky, white resin and may grow 10in (25cm) long.

☀️💧 Z7-9

Pinus x holfordiana (Holford pine)
Broadly conical, open conifer with large cones, brown when ripe. Pendent, glaucous blue-green leaves are held in clusters of 5.

☀️💧 Z6-7

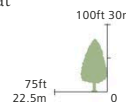

SILVER

Abies procera (Noble fir)

Narrowly conical conifer with smooth, silvery-gray bark and gray-green or bright blue-gray leaves. Produces sturdy, cylindrical, green cones, 6-10in (15-25cm) long, that ripen to brown.

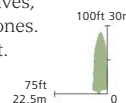

☀️💧 Z5-6

x *Cuprocyparis leylandii* 'Haggerston Grey'

Vigorous, upright, columnar conifer, tapering at the apex. Has smooth bark, becoming stringy with age, flat sprays of pointed, gray-green leaves, and dark brown female cones. A popular screening plant.

☀️💧 Z6-9 ⚠️

Pinus peuce (Macedonian pine)

Upright conifer, forming a slender pyramid. Has dense, gray-green foliage and cylindrical, green cones with white resin that ripen brown in fall. Is an attractive tree that grows consistently well in all sites.

☀️💧 Z5-9
