

Ocean records

Highest-jumping fish

Key features

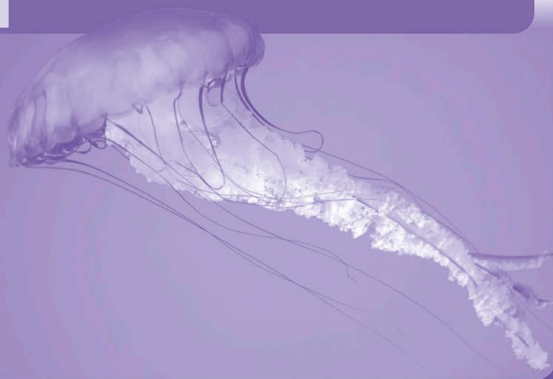

The thresher shark can jump 20 ft (6 m) out of the water. This shark has a very long tail to swipe and stun small prey.

Most dangerous animal

Key features

More than 5,000 people have died from box jellyfish stings. The venom contains about 200 different chemicals.

Deepest depth

Key features

The deepest point discovered on Earth is the Mariana Trench. It is 7 miles (11 km) below the surface of the Pacific Ocean.

Fastest fish

Key features

The sailfin mackerel can swim at speeds of up to 68 mph (110 kph). This ocean predator uses its long bill to tear into schools of fish.
