

Space timeline

Since humankind began exploring space in the 1950s, there have been a number of key moments. From the first satellite to the launch of the International Space Station, take a look at some of these amazing events.

Sputnik 1

1957

The first man-made satellite, *Sputnik 1*, took approximately 98 minutes to orbit the Earth.

1957

The first living creature was sent into orbit – Laika the dog was strapped into *Sputnik 2*.

1961

The first human in space was Yuri Gagarin, whose orbit of the Earth lasted 108 minutes.

1963

The first woman in space was Valentina Tereshkova on *Vostok 6*. The flight lasted 70 hours, 50 minutes and orbited the Earth 48 times.

1965

The first spacewalk, lasting about 10 minutes, was achieved by Alexei Arkhipovich Leonov.

Luna 3 was a Soviet spacecraft.

1959

We had our first glimpse of the far side of the Moon from the *Luna 3* spacecraft.

1969

The first human to step on the Moon was Neil Armstrong from *Apollo 11*. The other crew member who walked on the Moon was Edward “Buzz” Aldrin.

Astronaut Buzz Aldrin walks on the Moon.
