

hands on

Make your own Universe by drawing dots and spirals around a flat balloon to represent galaxies. As you blow air in, these “galaxies” move apart – that’s what’s happening to the Universe.

Dark mysteries

We can’t see everything in space. Experts think there’s lots of mysterious “dark matter” between the stars.

More of the same?

There might be other, parallel, Universes – experts call these the “multiverse”.
