

Tyrannosaurus rex

Theropod

This group of dinosaurs walked on two legs and had three-toed limbs. They were almost always meat-eaters, and some were huge and powerful hunters.

Ornithopod

These beaked dinosaurs were plant-eaters; *Iguanodon* was one of the largest to be identified.

Leaellynasaura

Triceratops

Marginocephalian

Their name means "fringed heads." This group included the horned and herbivorous *Triceratops*, as well as *Pachycephalosaurus*.

Vulcanodon

Sauropod

These huge, long-necked plant-eaters walked on four legs and included the *Diplodocus*.

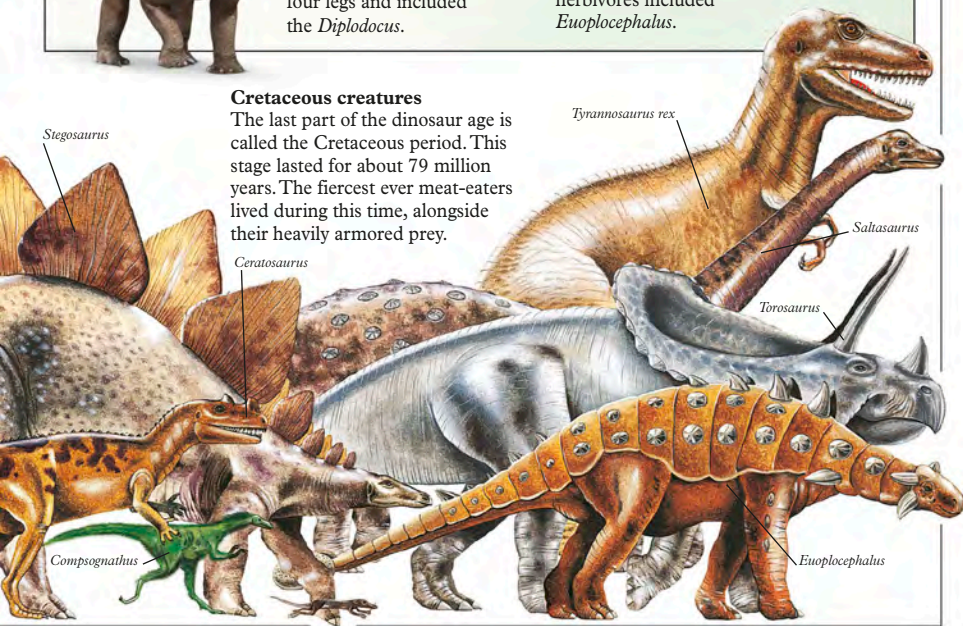

Euoplocephalus

Thyreophoran

This group of armored herbivores included *Euoplocephalus*.

Cretaceous creatures

The last part of the dinosaur age is called the Cretaceous period. This stage lasted for about 79 million years. The fiercest ever meat-eaters lived during this time, alongside their heavily armored prey.

Stegosaurus

Tyrannosaurus rex

Saltasaurus

Ceratosaurus

Torosaurus

Compsognathus

Euoplocephalus
