

SCULPTURE

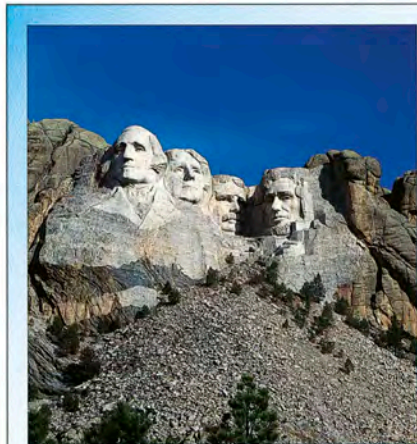

Mystery from the past

Strange statues were carved on Easter Island more than 500 years ago. Nobody knows for sure how the heavy heads were moved into place.

Many of Moore's sculptures are based on natural shapes, such as smooth pebbles.

Mountain men

Mount Rushmore has the heads of four American Presidents cut into it. It took 14 years to blast and drill Presidents Washington, Jefferson, Roosevelt, and Lincoln out of the rock.

In touch with nature

Some of the sculptures created by Henry Moore (1898–1986) look like people, but many are just interesting shapes.

This rounded sculpture is meant to be touched.

If you walk around this sculpture you see different, exciting shapes.
