

Lights, camera, keep still!

Wind, rain, and bad light can ruin your shots when you take pictures outside. This is why photographers work in studios. Many of the pictures in this book were taken in a studio.

The person having their photo taken is called the model.

The makeup artist gets the model ready to be photographed.

White paper reflects light back onto the model.

The photographer takes pictures when the model is in the right position.

The flash is much bigger than the flash on your camera!

Reflecting umbrellas produce a diffused soft light due to the larger size of the reflecting surface.

This camera is connected to a laptop by a cable. This allows the photographer to look at the images in more detail.

Three-legged frames or tripods prevent the camera and equipment from moving around.
