

Sweet chestnut

Poppy heads and seeds

All living things get rid of waste products.

All living things move, but you can't always see the movement.

A cat hears with its ears. Every living thing is sensitive in some way to the world around it.

Plant kingdom

There are many different kinds of plants. Some are soft and small enough to hold in your hand. Others are enormous and woody. Some plants have flowers, but others don't. Green plants use sunlight, water, and carbon dioxide to make their own food.

Gerbera flower

Raft spinner

Hoverflies

Badger

Animal kingdom

Animals have billions of very complex cells. Most of the world's animals, like insects, do not have backbones. Animals with backbones include mammals, birds, reptiles, amphibians, and fish.

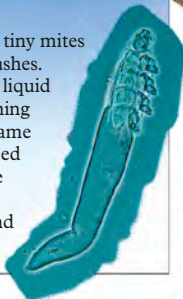

Hen with chicks

Grass snake

Lovely lashes

Some people have tiny mites living in their eyelashes. The mites feed on liquid from the eye, cleaning the lashes at the same time. The mites need people, and people need them. Many living things depend on each other.

Spotted salamander

Shore crab

Rudd

Cuban hock
