

Kazakhstan

Asia

In 2013, this Soyuz spacecraft launched on a Soyuz-FG rocket from the cosmodrome.

Pioneering spaceport

The world's first and largest launch site for spacecraft is the Baikonur Cosmodrome, near the city of Baikonur in Kazakhstan. It has been leased to Russia until 2050.

Fluffy fox

In Kazakhstan and other Central Asian countries, the Corsac fox roams across the flat, arid region known as steppe. Its thick fur allows it to endure the harsh climate.

Eagle hunters

The ancient tradition of hunting with golden eagles dates back 4,000 years. Kazakh hunters holding golden eagles still head out on horseback to look for foxes and hares.

Trained to recognize only the hunter's voice, a golden eagle is fiercely loyal and always returns after a kill.

Wild apples

The apples we eat today around the world originate from ancestor apple trees found on the slopes of the Altai Mountains.
