

St. Kitts and Nevis

Rock carvings

Prehistoric art by the indigenous Kalinago people has been found on rocks on St. Kitts.

St. Kitts and Nevis are **two islands** in the **eastern Caribbean Sea**, separated by a **tiny channel** of sea known as **The Narrows**. Black sands found on both islands come from the rocks of **Mount Liamuiga**, a volcano.

Calico vine

The evergreen calico vine thrives in St. Kitts's tropical rain forests. It traps insects and releases them covered in pollen.

Brimstone Hill Fortress

Built by Africans enslaved by British settlers, the 18th-century Brimstone Hill Fortress in the northwest of St. Kitts overlooks the Caribbean Sea. It was built to defend the island from the French navy.

Dominica

Boiling Lake

A large hot spring forms Boiling Lake, located east of the capital Roseau. Its water is heated by hot steam and gas escaping from under Earth's crust.

Whale watching

The warm Caribbean waters off Dominica are a good place to spot whales. More than 10 species of whales are found here, including the sperm whale (above).

Kalinago baskets

Reeds are woven by hand into traditional baskets by the Kalinago people and sold as island crafts.

The island of Dominica is known as the **"Nature Isle of the Caribbean."** About **two-thirds** of it is covered in **rain forest**, which is home to parrots and frogs. Dominica is vulnerable to **tropical storms** and **hurricanes**.
