

The living world

Our amazing world is filled with millions of species, or types, of living thing. They can be as big as an elephant or so small you have to look through a microscope to see them.

Spider

Dragonfly

Animals

The animal kingdom is made up of vertebrates (animals with a backbone) and invertebrates (animals without a backbone).

Micro-organisms

Micro-organisms are very tiny – they are made up of a single cell. This amoeba is magnified more than 100 times.

Coral reef

Mammals, birds, reptiles, amphibians, and fish are vertebrates.

Sunflower

Deer
