

Curiosity quiz

Look through the Age of the dinosaurs pages to identify each of the picture clues below.

Albertosaurus was a Cretaceous dinosaur.

The Mesozoic Era

This era is divided into three time spans, or periods:

The **Cretaceous** period was ruled by an amazing variety of dinosaurs.

The **Jurassic** period saw the emergence of massive plant-eating dinosaurs.

The **Triassic** period, the oldest, saw the appearance of Earth's first dinosaurs.

Geological time is always shown with the oldest period at the bottom of the list. It reflects the sequence in which rocks are laid down.
