

Curiosity quiz

Look through the Planet Earth pages and see if you can identify each of the picture clues below.

Earth and space science

Earth is a dot in a vast Universe filled with planets and moons, stars and galaxies. As far as we know, Earth is special because it is the only place that supports life. Earth and space science is the study of the structure of our planet – and everything that exists beyond it.

The scientific study of volcanoes is called volcanology.

Materials science

Our Universe is filled with atoms and elements, molecules, mixtures, and compounds. Materials science is the study of these things, how they behave, how we use them, and how they react with one another.

One branch of science studies how materials can change.

Pictures of Earth from space help scientists understand Earth better.
