

Can you find...

A very rare kind of ape?
Orang-utans live only
in Borneo and Sumatra.

An animal with tusks that
grow through its face? The
babirusa is a kind of pig.

The world's largest flower?
Rafflesia grows to nearly
a metre (3 feet) wide.

Rice paddies

The wet climate is ideal for growing rice. Farmers plant it in flooded fields called paddies, which are sometimes built like steps in the sides of hills.
