

Lab equipment and techniques	150
Refining metals	152
Chemical industry	154
Carbon and fossil fuels	156
Hydrocarbons	158
Functional groups	160
Polymers and plastics	162

3 PHYSICS

What is physics?	166
Inside atoms	168
Energy	170
Forces and mass	172
Stretching and deforming	174
Velocity and acceleration	176
Gravity	178
Newton's laws of motion	180
Understanding motion	182
Pressure	184
Machines	186
Heat transfer	188
Using heat	190
Waves	192
Electromagnetic waves	194
Light	196
Optics	198
Sound	200
Electricity	202
Current, voltage, and resistance	204
Circuits	206
Electronics	208
Magnets	210
Electric motors	212
Electricity generators	214
Transformers	216
Power generation	218

Electricity supplies	220
Energy efficiency	222
Renewable energy	224
The Earth	226
Weather	228
Astronomy	230
The Sun	232
The Solar System I	234
The Solar System II	236
Stars and galaxies	238
Origins of the Universe	240

Reference—Biology	242
Reference—Chemistry	244
Reference—Physics	246
Glossary	248
Index	252
Acknowledgments	256
