

Shoelaces can be tricky when you start off,
so ask someone to show you how to do it.
If you practise lots you'll be doing
your own laces very soon!

Zip or buttons?

Most buttons are done
up by putting the button
through the **buttonhole**.

Zips are made up of little
teeth that come together
to close. Pull the zip up to
bring the teeth together.

Check the label so you put
your top the right way round.
The label goes in the back.

Try laying out your clothes on the
floor before putting them on to
make sure they're not inside out.
