

Fingerprints

The skin on your fingertips is covered in little lines. This pattern is your fingerprint. No one else in the whole world has the same fingerprints as you.

Look closely

Is your fingerprint...

an arch?

or a loop?

or a whorl?

Did you know?

Your skin color is unique, just like your fingerprint. You get your skin color from your parents. Sunshine makes it get darker.

Decorate your prints with felt-tip markers...

and googly eyes.

Try it out

Print your fingertips using colorful inks. What pattern do your fingerprints make?

Ink pad

Push your finger into the ink.

Paper

Print your finger onto paper.
