

Yummy food

Your body needs lots of **energy** to work and grow. All your energy comes from **food**.

Different types of teeth do different jobs. Incisors cut food, canines rip food, and molars crush it.

Starchy foods, such as bread, pasta, and rice give you lots of energy.

Fruit and vegetables are full of fiber and vitamins.

What should you eat?

Different types of food have different nutrients. That's why it's important to eat a balanced diet.

Proteins, such as meat, eggs, and beans make your cells healthy.

You also need healthy fats, found in foods such as avocados and nuts.

Milk, cheese, and yogurt are full of calcium that makes your bones strong.
