

Try it out

Make pretend germs by putting glitter on your hands. Can you wash them off?

You can't see real germs on your hands! But you can wash them off with soap and water.

Skin

Your skin is like a tough shield. Germs can't get through it unless you have a cut.

Neutrophils rush to a cut to stop germs entering your body.

Macrophages hunt down germs and gobble them up.

Lymphocytes poison germs or tell macrophages where germs are.

Defense squad

These special white blood cells help your body fight back against nasty germs!
