

My body map

Now you've seen some of your insides, you can make a **map** of your own **body**!

You will need:

A large roll of paper

Felt-tip pens

Scissors

Use a different colour for each organ so you can tell them apart.

Unroll the paper and lie down on it. Ask a friend to draw around your body.

With your pens, draw on your eyes, mouth, nose, ears, and brain.
